Fresenius Kabi Expands U.S. Manufacturing Infrastructure

We are pleased to announce the FDA approval of additional filling lines at our Grand Island, NY manufacturing facility.

These state-of-the-art lines are part of the ongoing investment in our U.S. manufacturing and supply chain infrastructure and will play an integral role in preventing shortages of critical drugs. The new lines improve our production capacity and reduce the likelihood of supply interruptions.

We will begin transitioning our **Oxytocin Injection, USP Single Dose Vials** and **Heparin Sodium Injection, USP Vials** to these new lines in December.

The tables below outline changes to NDCs as well as anticipated release timing of new presentations. Please note that presentations that are currently in plastic vials will transition to flint glass vials.

We understand the significance of both Oxytocin and Heparin to patient care and appreciate your ongoing partnership as we work to ensure supply continuity of these life-saving medicines.

For product availability updates, please visit our web site [at www.fresenius-kabi.com/us/pharmaceutical-product-availability](http://www.fresenius-kabi.com/us/pharmaceutical-product-availability), call our Customer Service team at 1-888-386-1300, or contact your wholesaler.

For clinical questions, please contact Fresenius Kabi USA Medical Affairs at 1-800-551-7176, Monday-Friday between 8 a.m. and 5 p.m. (CST) or email medinfo.USA@fresenius-kabi.com.

Sincerely,

Matt Kozak

Senior Manager, Marketing
